DIGITAL TECHNOLOGY IN NURSERY

Information for Parents

Together we make a Family!
Growing Happy, Healthy Children

KingsWellies Nursery

Digital technology plays an increasing part in daily life.

Children will see digital technology in use when they are out an about

* at the supermarket checkout

* at the bank

* at the library

* at the petrol station

* at the clinic or dentists

* at the travel agents

* at the post office

What do children
Learn from digital technology?

Using digital technology can help your child to:

* develop hand eye/eye coordination

* concentrate for longer periods of time

* improve listening skills

* follow instructions

* develop mouse and keyboard skills

* develop position, movement and direction skills

* feel a sense of achievement

Children develop their digital technology skills through a variety of programmes especially designed for pre-school children.

Many of the programmes available are designed to develop pre-number and pre-reading skills. This is what we often use our smartboards for.

Other programmes provide opportunities for colour recognition, sequencing, following favourite nursery rhymes and colour and shape matching.

Please speak to nursery staff if you would like to know more about the digital technology in nursery.
